

Chapter 3.3a List of Category 5 Impaired Waters

The complete integrated list in Chapter 3.3 is a general list of all surface waters in Virginia. The Category 5 Impaired Waters List in Chapter 3.3a is a subset of the integrated list of waters in the Commonwealth which do not support one or more of the applicable designated uses (i.e. wildlife, aquatic life, fish consumption, shellfish consumption, recreation, drinking water and the new Chesapeake Bay uses.) This chapter contains more detailed information about these waters which do not meet Virginia's numeric and/or narrative Water Quality Standards or criteria.

Priority for TMDL Development

Section 303(d) of the Clean Water Act and the Environmental Protection Agency's (EPA) regulation 40 CFR Section 130.7(d) (1) promulgated in July, 1992, requires each state to submit a Total Maximum Daily Load (TMDL) Priority List to EPA in even numbered years. TMDL development priority ranking for Category 5 impaired waters is based on two factors: first, the severity of the impairment, including consideration of the number of beneficial uses lost, number of pollutants responsible for the impairment and the presence of endangered species in the impaired waters; second, the availability of "tools" to develop the TMDL. Availability of tools includes such things as on-going data acquisition activities in the watershed, the existence of current data such as load allocations, and the interest, cooperation and backing of the affected public. Additionally, other programmatic requirements such as the need for the waste load allocation (WLA) component of a TMDL by a VPDES permit may be part of the tools necessary for priority ranking. Waters that are impaired and already have many of the TMDL tools available are generally defined as high priority for TMDL development. Waters with less severe impairments and those with fewer TMDL development tools are ranked medium or low priority for TMDL development.

Due to the TMDL requirements of the 1999 Consent Decree, the priority ranking for newly listed waters, which are not part of the Consent Decree schedule, will have to be considered on a case by case basis. It has become normal practice in Virginia that any new segments within a waterbody already scheduled for TMDL development will be included in that TMDL study if appropriate.

TMDL development dates, localities, dates of listing, and other causes of impairments are found in the Impaired Waters List (Chapter 3.3a). Waters listed as impaired for the first time in the 2008 report are also listed separately in Chapter 3.3b.

All Category 5 waters are considered impaired and likely needing a TMDL. Most, but not necessarily all subcategories of Category 5 will require a TMDL. Waters categorized as 5A, 5B, or 5D in the 2008 Impaired Waters List are waters that DEQ believes need a TMDL study. 5C waters are believed to be impaired due to natural conditions. Further study of each Category 5C water are needed to determine if a TMDL is applicable or if changes to Water Quality Standards are appropriate to reflect those natural conditions. Nevertheless, 5C waters are listed with TMDL development dates in the Impaired Waters List.

Category 5E waters are similar to Category 4B waters. They will meet Water Quality Standards based on permitted limits by means other than a TMDL. 5E waters are waters where the VPDES compliance date is expected to extend beyond the next assessment report date (2010). They are not scheduled for TMDL development as the permit requires compliance with Standards. One example of a "Category 5E" water is an existing facility that cannot be modified to meet new Standards within the next two-year report cycle. In this example, a new facility would be necessary to replace the existing one and a compliance schedule would likely need to be issued with the permit during the interim construction.

Changes in Impaired Water Criteria Since the 2002 Assessment

A significant change in the 2002 assessment that has continued through the 2008 assessment and report was the assessment of fish tissue data and the listing of waters as impaired where two or more exceedences of the human health surface water criteria screening value were detected at the same Final 2008

station. This action was taken in order to safeguard human health. Additional information regarding fish tissue monitoring and assessment can be found in Chapter 2.1.

Public Participation Process

Immediately before the release of the public comment draft report, DEQ will send a letter of notification to each locality, Department of Health District, Planning District Commission, and Soil and Water Conservation District in Virginia. Included in these letters is a link to a webpage where a "fact sheet" on all impaired waters is available. Notice will also be sent to the Virginia Department of Game and Inland Fisheries and Virginia Marine Resources Commission regarding posting of waters with impairments due to toxic, health related pollutants. DEQ will prepare and send a hard copy of the fact sheets to any of these organizations upon their request.

DEQ will invite public comment on the draft 2008 305(b)/303(d) Integrated Report from June 16 through July 25. There will be a press conference on June 16. To reduce related travel, there will also be one statewide public information teleconference, shown simultaneously at DEQ headquarters and each regional office, on June 24.

On June 16th, the draft 2008 water quality report will be available on the DEQ website at www.deq.virginia.gov/wqa and via CD by request.

Written comments on the draft Integrated Report can be sent to: Darryl M. Glover, DEQ Water Quality Monitoring and Assessment Manager, via e-mail attachment to, dmglover@deq.state.va.us, or (US) mail to P.O. Box 1105, Richmond, Virginia 23218. Please include your name, (US mail) address, telephone number, and e-mail address.

Upon completion of the public participation process, DEQ will prepare a comment response document, make needed revisions to the report, and submit both to EPA. When EPA approves the final report it will, like the draft, be available for download via the Internet at www.deq.virginia.gov/wqa. When approved by EPA, the 2008 final report, including all appendices, will also be available on a compact disc. Map images of impaired waters (by major river basin or sub-basin) along with the entire report and all appendices will be included on these compact discs. These CDs can be pre-ordered now at no cost via the URL above or by calling DEQ at (804) 698-4575. A hard copy of the final 2008 maps can be pre-ordered for a fee that will cover publication and shipping costs. A print and mail order form for hard copy maps is available at the URL above.

2008 Impaired Waters - 303(d) List

Category 5 - Waters needing Total Maximum Daily Load Study

Potomac and Shenandoah River Basins

Cause Group Code Impaired Use	Water Name Cause	Cause Category	Estuary (Sq. Miles)	Reservoir (Acres)	River (Miles)	Initial List Date	TMDL Dev. Date
A02R-02-BAC Recreation	North Fork Catoctin Creek Escherichia coli	5A			3.15	2008	2020
A02R-02-BEN Aquatic Life	North Fork Catoctin Creek Benthic-Macroinvertebrate Bioassessments	5A			4.12	2008	2020
A02R-03-BEN Aquatic Life	South Fork Catoctin Creek Benthic-Macroinvertebrate Bioassessments	5A			3.40	2004	2016

2008 Impaired Waters - 303(d) List

Category 5 - Waters needing Total Maximum Daily Load Study

Potomac and Shenandoah River Basins

Cause Group Code Impaired Use	Water Name Cause	Cause Category	Estuary (Sq. Miles)	Reservoir (Acres)	River (Miles)	Initial List Date	TMDL Dev. Date
POTMH-SAV-BAY	Potomac Mesohaline Embayments						
Aquatic Life	Aquatic Plants (Macrophytes)	5A	32.049			2006	2010
Shallow-Water Submerged Aquatic Vegetation	Aquatic Plants (Macrophytes)	5A	32.049			2006	2010

VA DEQ is transitioning from Fecal Coliform bacteria to Escherichia coli (fresh water) and Enterococci (salt water) for assessing the Recreational Use.

* Multiple listings are due to the same impairments for different uses and/or different initial listing dates for adjacent waters.

VA DEQ is transitioning from Fecal Coliform bacteria to Escherichia coli (fresh water) and Enterococci (salt water) for assessing the Recreational Use.

* Multiple listings are due to the same impairments for different uses and/or different initial listing dates for adjacent waters.

VA DEQ is transitioning from Fecal Coliform bacteria to Escherichia coli (fresh water) and Enterococci (salt water) for assessing the Recreational Use.

* Multiple listings are due to the same impairments for different uses and/or different initial listing dates for adjacent waters.

VA DEQ is transitioning from Fecal Coliform bacteria to Escherichia coli (fresh water) and Enterococci (salt water) for assessing the Recreational Use.

* Multiple listings are due to the same impairments for different uses and/or different initial listing dates for adjacent waters.

2008 Impaired Waters - 303(d) List

Category 5 - Waters needing Total Maximum Daily Load Study

Chesapeake Bay/Atlantic/Small Coastal Basins

Cause Group Code	Water Name	Cause Category	Estuary (Sq. Miles)	Reservoir (Acres)	River (Miles)	Initial List Date	TMDL Dev. Date
Impaired Use	Cause						

VA DEQ is transitioning from Fecal Coliform bacteria to Escherichia coli (fresh water) and Enterococci (salt water) for assessing the Recreational Use.

* Multiple listings are due to the same impairments for different uses and/or different initial listing dates for adjacent waters.

Aquatic Life	Aquatic Plants (Macrophytes)	5A	26.651			2006	2010
Shallow-Water Submerged Aquatic Vegetation	Aquatic Plants (Macrophytes)	5A	26.651			2006	2010

VA DEQ is transitioning from Fecal Coliform bacteria to Escherichia coli (fresh water) and Enterococci (salt water) for assessing the Recreational Use.

* Multiple listings are due to the same impairments for different uses and/or different initial listing dates for adjacent waters.

2008 Impaired Waters - 303(d) List

Category 5 - Waters needing Total Maximum Daily Load Study

New River Basin

Cause Group Code Impaired Use	Water Name Cause	Cause Category	Estuary (Sq. Miles)	Reservoir (Acres)	River (Miles)	Initial List Date	TMDL Dev. Date
